- 46. Implant according to claim 43, wherein the thickness of the unitary sheet increases when contacted with a shighle liquid.
- 47. Implant according to claim 43, wherein the surface is wetted by said fluid lubricant, and the lubricant is swellagle.
- 48. Implant according to claim 47, wherein the lubricant is a polysaccharide or glucosaminoglycan.
- 49. Implant according to claim 43, wherein the surface of said thin sheet includes a hydrophoblizes surface.
- Mydrophobized surface as the fluid lubricant.
 - 51. Replant according to claim 43, wherein material is a plastic.
 - 52. Impligit according to claim 43, wherein material is a silicone righter.
 - 53. Implant according to claim 43, wherein the material comprises polydimethylsiloxane.
 - 54. Implant according to claim 43, wherein the material is a polysaccharide.
 - 55. Implant according to claim 51, wherein the plastic is cuprophane.
 - 56. Implant according to claim 13, wherein the material has a foam structure.
 - 57. Implant according to claim 43, wherein an X-ray contrast medium or a dyc is incorporated into the material.
 - 58. Implant for the reconstruction of soft tissue, said implant comprising: a unitary sheet of a physiologically compatible material having a thickness of 10 200 μ m and a surface that is wettable by a fluid lubricant, said unitary sheet being rulled to form concentric layers forming the implant, the concentric layers being slidable on one another.
